Your Endodontic Treatment is Completed

- 1- You can expect some post-operative soreness as a result of treatment. This should diminish in a few days however; a slight awareness may persist in the treated tooth for a longer period of time. Two TYLENOL or Advil tablets at 4 hour intervals can be used to reduce any your symptoms
- 2- Please call your dentist next week and make an appointment to restore the treated tooth.
- 3- Avoid chewing on the treated tooth until your dentist completes the final restoration.
- 4- Thank you for your cooperation during treatment. IF you have any questions or problems please feel free to call upon us at any time.
