

Welcome to our practice, Integrated Periodontics and Dental Implants. We appreciate the opportunity to become your personal periodontal and dental implant provider. Your dentist may have already advised you that you may have an issue with your gums or teeth. Our specialty practice provides the highest level of surgical and non-surgical care through a philosophy that emphasizes early detection, early intervention, prevention, and long-term maintenance.

We look forward to meeting you at your consultation. This time has been reserved to meet your needs and we thank you in advance for honoring your appointment. Patients are seen by scheduled appointment only, Monday through Friday, although we offer same day appointments for acute needs. Patients will be directed to the appropriate On Call Provider when calling our office after hours, including weekends and holidays.

Your initial visit to our office will include a review of your medical and dental history, as well as a comprehensive evaluation of your mouth. In addition, we may take a full mouth series of digital photographs to document your current condition. After we reach a diagnosis, we will discuss treatment options and present an estimate of the time and cost of your treatment. Enclosed or attached, you will find our Health/Dental History form and other materials. We will contact your last dental provider to see if we can obtain radiographs. This will help us determine the extent of damage to your bone, if any. If you have dental insurance and would like to use your benefit, providing your subscriber information to our office will allow us to determine your eligibility prior to your appointment. Please bring the completed items, with your referral slip, to your appointment.

Communication is important to us. You are encouraged to ask questions about your issues and the proposed treatment options. If you wish, you may bring your spouse, partner or trusted family member to take part in any discussion. After your examination, we will inform your dentist of our findings and keep them apprised of your progress.

We look forward to meeting with you.

Jonathan Wong, DDS  
Limited to Periodontics and Dental Implant Services
