

## **Appendix 2 Bethesda Integrative Medicine's Itemized Fees**

In-Office Procedures (subject to change) listed on the Practice website (<http://www.bethesdainegrative.com/pricing/>) are available at no additional cost

Laboratory Studies will be drawn in the office at no additional charge and the Patient will be charged the same rate the lab provides to the practice. An example of common laboratory studies and their prices (subject to change) will be listed on the practice website <http://www.bethesdainegrative.com/pricing/>

Medications will be ordered in the most cost effective manner possible for the Patient. If we dispense medications in the office these medications will be made available at wholesale cost with a 10% mark up + \$1.00.

Pathology studies (typically skin biopsies) will be ordered in the most economical manner possible. Anticipated prices for these studies (subject to change) will be listed on the Practice website (<http://www.bethesdainegrative.com/pricing/>)

Radiology studies will be ordered in the most cost effective manner possible for the Patient.

Surgery and specialist consults will be ordered in the most cost effective manner possible for the Patient.

Vaccinations, except for "flu shots" are NOT offered in our office at this time due to the cost prohibitive nature of stocking a limited supply. Flu shots will be offered during the appropriate season. We will make an effort to help you obtain needed vaccinations elsewhere in the most cost effective manner possible.

Hospital Services are NOT covered by our membership plan, and due to mandatory "on call" duties required at local institutions we have elected NOT to obtain formal hospital admission privileges.

Obstetric Services are NOT covered by our membership plan.
